

ROSHAN KUMAR MANDAL

Data Analyst | Power BI • SQL • Excel

Bangalore, Karnataka | roshankumar5912@gmail.com | +91 9019789226 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on project experience in Power BI, SQL, and Excel, turning raw business data into clear, decision-ready insights. Skilled in data cleaning, dashboard design, and KPI tracking across sales, customer retention, and marketing funnel use cases. Known for translating analysis into actionable recommendations that support business and marketing decisions.

TECHNICAL SKILLS

- **Data Analytics:** Power BI (DAX, Data Modeling), Advanced Excel (Pivot Tables, Power Query, VLOOKUP), SQL (Joins, CTEs, Window Functions, Stored Procedures)
- **Programming for Analytics:** Python (Pandas, NumPy, Matplotlib)
- **Visualization & Reporting:** Interactive Dashboard Design, KPI Analysis, Data Storytelling, Business Reporting
- **Databases:** MySQL, MongoDB
- **Programming:** Java, JavaScript, HTML, CSS
- **Tools:** Git, GitHub

EXPERIENCE

Data Science & Analytics Intern | *Future Interns*

- Built interactive Power BI dashboards to analyze sales performance, customer retention, and marketing funnel efficiency, enabling faster, data-driven decisions.
- Cleaned, transformed, and modeled real-world datasets, and developed KPI metrics including revenue trends, retention rate, churn rate, and conversion rate.
- Identified high-performing products, customer behavior patterns, and funnel drop-off points through exploratory data analysis.
- Presented data-driven recommendations to stakeholders to improve business performance and marketing efficiency.

DATA ANALYTICS PROJECTS

Business Sales Performance Dashboard | *Power BI*

- Analyzed multi-category sales data to surface revenue trends, top-performing products, and regional performance.
- Designed an interactive dashboard tracking total sales, profit margin, and category-wise KPIs to highlight growth opportunities.

Customer Retention & Churn Analysis | *Power BI*

- Analyzed customer purchase behavior to calculate retention and churn rates across customer segments.
- Built dashboards comparing repeat vs. one-time customers, delivering insights to improve engagement and retention.

E-Commerce Sales Analysis | *SQL, Python (Pandas, NumPy, Matplotlib)* | [GitHub](#)

- Built an end-to-end sales analytics workflow across six relational tables (customers, orders, products, sellers, payments) using SQL and Python.
- Wrote advanced SQL queries with CTEs, window functions, and running/moving averages to analyze top sellers, monthly trends, and customer retention.
- Used Python to clean data and visualize revenue by category, monthly sales trends, and top-seller performance.

E-Commerce Sales Analytics Dashboard | *MySQL, Power BI* | [GitHub](#)

- Designed and normalized a relational database to analyze 50,000 e-commerce transactions end-to-end.
- Applied advanced SQL (joins, window functions, CTEs, views, stored procedures) to compute revenue, average order value, and customer KPIs.
- Built an interactive Power BI dashboard tracking revenue by category and country, monthly trends, payment methods, and top customers.

CERTIFICATIONS & ACHIEVEMENTS

- Data Analytics Job Simulation — Forage (May 2025), Credential ID: 658EjdTnakEZo4cy3
- AI Tools Workshop — United Latino Students Association
- Introduction to MS Excel — Simplilearn | SkillUP

EDUCATION

B.E. in Computer Science (Data Science)

AMC Engineering College | Expected Graduation: 2027
